

## B-REP - DRAWING - FEATURE BASED – TRANSLATOR

### Dedicated tools to SolidWorks

More than 20 plug-ins or stand alone converters ease native or neutral data exchanges with most of the other Cad Solution available worldwide.

Above the Top 5 tools downloaded through [www.datakit.com](http://www.datakit.com): **GOLD** Catia V5 to SolidWorks, Catia V4 2D to SolidWorks, UG to SolidWorks, SolidWorks to Rhino V3 and SolidWorks to Iges.

### A range of unrivalled depth

Recover all the data provided by your colleagues, partners or customers disregards the type of files supplied: 3D parts, Assemblies or 2D Drawing.

2D, 3D Geometric, Topologic Information are supported as well as data such as Attributes, History tree, FD&T and Features.

Many parameters meet your specific needs (choice of axis, entities layers ...)

## Objectives

Offering you **GOLD** high end complementary data exchange solutions in addition to your standard ones

Allowing you to work with all the 2D, 3D, Attributes... information you request

### Take the opportunity to recover Information setting in the history tree of Catia V5

This powerful translator allows you to identify geometric and machining features available in the tree and exact models of Catia V5, and use them directly in SolidWorks. That way, you work back by a complete assembly tree to designer's original intent. It offers you the chance to edit Catia V5 attributes and modify them in SolidWorks.

Numerous Catia V5 components are converted: sketch, dress-up, surfaces, based components. Transformation features are also covered.

### Cooperation and Patners hunting

Datakit collaborates with many SolidWorks partners that distribute its data exchange solutions around the world and also propose data translation services throughout their internet portals. Proud of its experience abroad (70% of its turnover), Datakit wishes to develop its market shares especially throughout setting up a stronger network of resellers. Join us!

### See you soon during SolidWorks World 2008!

Datakit is a privately-owned company specialised in CAD Data Exchanges and services founded in 1994 by Francis Cadin. Its very core target is even more the software companies, however, the translators are sold in different countries by a growing network of resellers or on line. Its clearly identified strategy lies on 3 major axis: international focus, close relationships with software editors, multiple fields of targeting.
